

# seasats X3

Launch in minutes - perform for months

## The Seasats X3: a force multiplier for modernized naval operations

The X3 is a portable, low-cost, high endurance autonomous surface vehicle (ASV) that fills the strategic gap between exquisite crewed vessels and range-limited RC vehicles.

With a small form factor, modular payload bay, and set-and-forget autonomy, X3 ASVs can surveil, distract, and disorient adversaries without risking lives or resources.

### Multi-Mission Capabilities

- Maritime Domain Awareness (MDA)
- Intelligence, Surveillance, and Reconnaissance (ISR)
- Electronic Warfare (EW)

### Distinguishing Features

- Near-zero radar signature
- Self-scuttle/anti-tamper capabilities
- Low cost / attritable
- Two-person portable

**DoD validated** at Digital Horizon, Trident Spectre, & Thunderstorm TIDE
